## IMPORTANT Domestic Water Caps

Following a review of domestic water use, the Trust Board has resolved to reinstate a limit on domestic water use. These limits, which come into effect from **1 July 2019**, will be based on previous practice and will ensure the Trust has sufficient domestic water to distribute to all customers fairly.

Customers can still use more than the limit, however, use above the limit will need to be leased in or can be covered from an irrigation allowance.

Customer Meter Type	Domestic Limit	If Limit Exceeded
Domestic meter only (non-rated land)	<b>928 kL</b>	Lease additional allocation
Domestic meter and irrigation meter	<b>295 kL</b>	Taken from irrigation allowance
Dual purpose meter	<b>295 kL</b>	Taken from irrigation allowance

Please note – these limits will be an allowance to be used through your domestic meter and cannot be leased out or used to supplement irrigation.

If you need any assistance determining what your domestic allowance will be please contact this office.
